

Rivet[®] Solutions for SEC Filers

SOFTWARE

The Standard Agreed-Upon Procedure Tool for XBRL Verification

Rivet's products and services are designed specifically for accountants and finance professionals to transform the disjointed and manual financial reporting and sec filing processes in place today. Each of Rivet's solutions targets inefficiencies in a company's close to investor process, and is customizable to fit any business case. Whether a company just wants help with their XBRL review, or needs a complete end to end solution that aggregates data across the organization, Rivet's tools improve compliance, control and communications of essential business data.

Crossfire[®] Compliance

Crossfire Compliance is the most tested, used and proven XBRL compliance solution on the market. It is used by over 35% of the world's Fortune 500 corporations to manage, automate and improve the delivery of fully compliant XBRL filings to the SEC. Organizations can choose to outsource the XBRL requirements to Rivet's team of experts (over 2,000 filings to date) or manage the process themselves using Crossfire.

Crossfire[®] Controller

Crossfire Controller integrates and streamlines the external financial reporting process to eliminate manual tasks while delivering a superior level of quality control. This solution leverages the power of XBRL to create efficiencies that dramatically improve the workflow of financial reporting cycles. Developed by accountants who have first-hand experience with the pitfalls of using antiquated reporting processes, Crossfire Controller frees users from administrative tasks and flawed systems that can reduce the quality of their work.

Crossfire[®] Analyst

Crossfire Analyst, designed specifically for finance and accounting users, is a robust and sophisticated web-delivered application that supports the aggregation, comparison and analysis of XBRL data. Create peer group and cross-industry comparisons and benchmarks and distribute custom reports and documents, all from within Crossfire Analyst. Integrated into Microsoft Excel, Crossfire Analyst empowers users to automate financial statement analysis as well as XBRL mapping comparisons.

DragonView[™]

With a growing demand to verify XBRL-based information, Dragon View helps CPA and Audit firms ensure clients comply with the SEC XBRL reporting requirement, while conducting in-depth Assurance engagements under the AICPA's SOP 09-1 (Agreed Upon Procedures). Dragon View helps you review and verify XBRL information free of technical complexity. Use this easy application to assure and verify your clients' XBRL information directly from the underlying XBRL package of documents and create expert, value-added services.

About Rivet Software

Founded in 2002 and headquartered in Denver, Rivet Software is at the forefront of standards-based business reporting and analytics. Rivet empowers companies with control over the collection, analysis, and dissemination of their internal and external financial information to help advance the transformation of business communication worldwide. This privately-owned technology company works with more Fortune 500 companies than any other XBRL vendor and emerged from Q4 of 2010 as the XBRL vendor of choice for companies in search of a cost-effective, reliable solution for SEC reporting compliance.
